THE COUNCIL FOR TOBACCO RESEARCH–U.S.A., INC.

March 4, 1975

To: The Scientific Advisory Board

Subject: Basic and Supportive Contract No. 14B - Microbiological Associates, July 1, 1975 - June 30, 1976

The studies to determine susceptibility to lung carcinogenesis in genetically defined mouse strains have been carried out under the direction of Drs. Carrie Whitmire and Richard Kouri at Microbiological Associates.

The activities to be undertaken during each funding period are proposed by the contractor with close staff liaison. The Scientific Director and Research Director further refine these proposals, deleting or adding as felt appropriate. Site visits are arranged between contractor, SAB members of the contract committee, CTR representatives including Scientific Director and Research Director, and, as of the forthcoming period of Contract No. 14B, outside consultants with special scientific expertise in the area under consideration. (Periodic site visits are made during the year to follow up the progress). Recommendations and proposals are then submitted to the SAB for formal considerations. Final budgetary negotiations are carried out by CTR's Scientific Director and contractor following the SAB meeting and in line with budgetary recommendations, limitations, etc. of the CTR.

The current proposal, subject to negotiations, revision pending, recommendations of reviewing groups, etc. is attached. This represents a consolidation of Grants No. 2 and 14, arbitrarily divided some years ago for budgetary considerations.

Funding history for the past year:

| | | Amount | Annual Amount |
|---|---|---|---|
| No. 2F | 2/1/74 - 1/31/75 | $137,500 | |
| No. 14A | 7/1/74 - 6/30/75 | $350,000 | |
| | | | $487,500 |
| No. 14AS | Supplement 1/31/75 - 6/30/75 (to bring two contracts to same initiation date). | $ 58,000 | |
| Requested (subject to SAB approval, negotiation, etc.) | | | |
| No. 14B | 7/1/75 - 6/30/76 | | $522,794 |
